## STRATHEARN PRODUCT RANGE SHEET: ARCHITECTURAL PORCELAIN COLLECTION

The Architectural collection offers reassuring continuity of colour and surface texture in fabulously large tiles. For an understated floor in soft subtle shades choose from our Stucco, Sheffield and Seattle ranges or for a striking contemporary but practical finish, consider our Docklands range. All of our architectural porcelain can be used externally too, perfect for a seamless transition from inside to out.

Suitable for high-traffic areas e.g. Residential & Commercial	✓	✓	✓	✓

\* Docklands tiles have a subtle pillow edge.

\*\* 20mm outdoor flag option available

## NON-RECTIFIED AND RECTIFIED

Non-rectified porcelain or ceramic tiles are cut to size prior to the firing process. The firing process then causes a degree of shrinkage and warping. These tiles are graded after firing but do not undergo any additional cutting. Because of this, greater variation in size (usually a matter of 1-2mm difference) between tiles should be expected compared with a rectified tile.

Rectified tiles are cut to size after the firing process and so are much more precisely sized and have perfect 90 degree corners.

When designing the tile layout consideration should be given as to whether tiles are rectified or non-rectified as this will have an influence on joint width and pattern.

## FINISHING

Although porcelain tiles are highly resistant to staining due to their dense nature, we advocate that a coat of sealant is applied following installation. This not only gives added protection to your porcelain, but helps protect grout lines from staining too. We recommend Lithofin KF Protective Impregnator which is suitable for both internal and external use.

## CLEANING

- Sweep or vacuum porcelain floors regularly.
- Microfibre mops are ideal for porcelain floors however dampen mop slightly rather than saturating. We recommend using Lithofin KF Conditioning Cleaner.
- Always wipe accidental spills up immediately using a soft, slightly damp cloth.

## PROTECTING

Porcelain flooring and walling is relatively easy to look after, although there are a few things that you can do to ensure that your porcelain continues to perform for you:

- Place felt floor pads under furniture for damage-free moving.
- Never place organic material such as potted plants directly onto porcelain.
