

## CRAFTSMANSHIP

Strathearn aged oak or natural stone floors are the most hardwearing and practical you can choose. They also look stunning and only become lovelier with age, particularly if your choice of flooring is fitted by our specialist installers. We have invested years in finding individuals with the perfect balance of traditional skills and technical expertise to make a team unrivalled in craftsmanship, knowledge and understanding. We are trusted with historic restoration and sensitive heritage projects but equally known for our work with prestigious interior designers and alongside architects on award-winning new construction. Wood and stone are always naturally appealing. But to transform spectacular raw materials into the lasting beauty of an original Strathearn takes the talent of experts dedicated to nothing else but creating our distinctive floors.
